

# ENHANCED CARE AT HOME ECAH

## THE BASICS

ECAH is a special Home Health (HH) program for **SNF appropriate patients**. These patients are referred to home health for high intensity nursing (RN) and/or rehab (PT, ST, OT) services.

High intensity is defined as daily visits for the first 3-7 days for a minimum of 14 days. Patients under this program are managed by contracted agencies under the oversight of KPCA's Community Agency Division (CAD).

## IMPORTANT INFORMATION

- ✓ Place referral **prior to 12 pm**. Referrals placed after 12 pm may have a delayed Start of Care (SOC)
- ✓ Frequency and duration of HH visits are determined by the HH clinician based on his/her assessment in collaboration with the physician
- ✓ Next day SOC's are for RNs or PTs. Only. OT, ST, CHHA, SWs will be assigned for home visits within 48-72 hours, if needed.
- ✓ Full email address for KPCA's CAD CLINICAL ESCALATION is: [KPCAHCADClinicalEscalations@kaiserpermanente.onmicrosoft.com](mailto:KPCAHCADClinicalEscalations@kaiserpermanente.onmicrosoft.com)
- ✓ In the subject line of your email, please write "ECAH" to ensure priority processing

## ELIGIBILITY CONSIDERATIONS

PATIENT  
REQUIRES  
SKILLED NEED  
FOR RN SERVICES

GOOD  
CARE GIVER  
SUPPORT AT  
HOME

GOOD  
PAIN CONTROL

PATIENT REQUIRES  
INTENSIVE  
INTERDISCIPLINARY  
THERAPY SERVICES  
(PT, OT, ST)

ABLE & WILLING TO  
TOLERATE HIGH  
INTENSITY,  
CONSECUTIVE VISITS

MAXIMAL TO  
MODERATE  
ASSISTANCE  
NEEDED

## MAKING A REFERRAL TO ECAH IS AS EASY AS 1, 2, 3...

1

**Collaborative case findings and patient willingness:** Case manager and physician identify potential patient. Patient expresses willingness to participate.

2

**Pre-notification to CAD via email for eligibility verification:** Email KPCA's CAD Clinical Escalation inbox with (1) patient name, (2) MRN, (3) anticipated DC date, (4) city/zip code where patient will receive home care services, (5) a confirmed contact number, and (6) physician who will be responsible for managing the HH care and signing orders, (7) subject line: ECAH

3

**Enter HH referral in KPHC:** CAD will confirm with case manager to place HH order in KPHC, with "Enhanced Care at Home" under comments

# ECAH

## SUPPLEMENTAL ELIGIBILITY INFO

### DETAILED ELIGIBILITY CONSIDERATIONS

#### PATIENT REQUIRES SKILLED NEED FOR RN SERVICES

- Patients requiring RN skilled care such as IV infusion, wound management, Tube feeding (Nasogastric and gastric), or Pleurex

#### PATIENT REQUIRES INTENSIVE INTERDISCIPLINARY THERAPY SERVICES (PT, OT, ST)

- Recent significant decline in functional mobility that requires an intensive interdisciplinary rehabilitation approach (PT, OT, ST), one of which must be physical or occupational therapy if rehab only.

#### GOOD PAIN CONTROL

- Patients with good pain control and ability to participate in consecutive days of rehab.

#### MAXIMAL TO MODERATE ASSISTANCE NEEDED

- Patients needing maximal or moderate assistance with transfers, gait less than 50 feet. (based on inpatient PT eval, or ADL's.
- Patients with mild to moderate aphasia, dysphagia, dysarthria, and cognitive impairment.

#### GOOD CARE GIVER SUPPORT AT HOME

- Patients who have a good caregiver support system at home to assist and follow through with care plan and mobility recommendations and/or home exercise routines established by the rehab team.

#### ABLE & WILLING TO TOLERATE HIGH INTENSITY, CONSECUTIVE VISITS

- Patients able and willing to participate and accommodate consecutive days of therapy according to the plan of care (POC)
- Patients able to tolerate high intensity of visits for rehabilitation which will be tapered as appropriate, and care handed over to the patient/caregiver or rehab clinic.

### WHO IS **NOT** ELIGIBLE FOR ECAH?

- Total hip and knee under Total Joint Program
- Hospice/palliative care patients
- Poor rehab potential without skilled therapy (PT/OT/SLP) needs if rehab only
- Severe dementia without skilled nursing needs
- Patient unable to follow commands without skilled nursing needs
- Patients requiring telemetry monitoring
- Patients requiring infusion of non-approved homecare IV medications
- Patients with trach but are not tolerating trach capping
- Patients with a trach placed within 30 days
- Patients on a chest tube
- Patient who resides in an unsafe or inappropriate residential home as determined by the initial screen or first home health visit
- Confirmed active substance abuse
- Less than 18 years of age
- Non-member
