

Important CDPH COVID-19 Practice Guideline Updates

Effective March 14, 2023 - Implement in RVMC Work

To align with members in our community inquiring about COVID-19 guideline changes, please review the community setting updates below.

NOTE: The following CDPH COVID-19 Practice Guideline updates apply to a **community setting** and *do not* apply to healthcare settings. Formal regional guidelines will be coming soon.

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/COVID-19/Guidance-on-Isolation-and-Quarantine-for-COVID-19-Contact-Tracing.aspx>

- Removes recommendation to test in order to leave isolation before Day 10, if the individual is well with no symptoms, or symptoms are mild or improving and are fever free for 24 hours
- After ending isolation, persons may remove their mask sooner than Day 10 with two sequential negative tests one day apart.
- Updates definition of infectious period

Infectious Period:

- For symptomatic confirmed cases, 2 days before the confirmed case had any symptoms (symptom onset date is Day 0) through Days 5-10 after symptoms first appeared **AND** 24 hours have passed with no fever, without the use of fever-reducing medications, and symptoms have improved, OR
- For asymptomatic confirmed cases, 2 days before the positive specimen collection date (collection date is Day 0) through Day 5 after positive specimen collection date for their first positive COVID-19 test.

Persons who Test Positive for COVID-19	Recommended Actions
Everyone, regardless of vaccination status, previous infection, or lack of symptoms. Persons in healthcare settings** should continue to follow regional recommendations and requirements.	Stay home (PDF) for at least 5 days after start of symptoms (Day 0) or after date of first positive test (Day 0) if no symptoms). • Isolation can end after Day 5 if: ◇ Symptoms are not present, or are mild and improving; AND ◇ You are fever-free for 24 hours (without the use of fever-reducing medication). • If fever is present, isolation should be continued until 24 hours after fever resolves. • If symptoms, other than fever, are not improving, continue to isolate until symptoms are improving or until after Day 10. • If the confirmed case has severe symptoms, or is at high risk of serious disease or has questions concerning care, they should contact their healthcare provider for available treatments. • Per CDPH masking guidance, infected persons should wear a well-fitting mask around others for a total of 10 days, especially in indoor settings.* • After you have ended isolation, if your symptoms recur or worsen, get

TIP: Frequently Used Links

I frequently access the Behavioral Health link on KP.org to find Behavioral Health department phone numbers for each of the different service areas:
