

Treating Traveling Members on GCN

Clinical Case Quiz

Ensuring Members Get Treatment

You are working a Get Care Now Shift and are licensed to practice medicine only in California. You are assigned a 54-year-old female with UTI symptoms. After reviewing her complaints, you determine she has symptoms warranting treatment with antibiotics. When you ask which pharmacy she'd like to receive medication from, she asks you to call it in to a pharmacy in Utah, as she's currently on a road trip. Which of the following is the best next step?

- a. Ask the Mentor for help.
- b. Call in the prescription to the Utah pharmacy of her choice.
- c. Let the patient know you're not licensed in Utah, so you can't help her.
- d. Message the Q Manager and let them know you have a patient who is currently outside of California.

The answer is d.

Handling Members Traveling Outside of California

Best Practices for Ensuring Patient Care

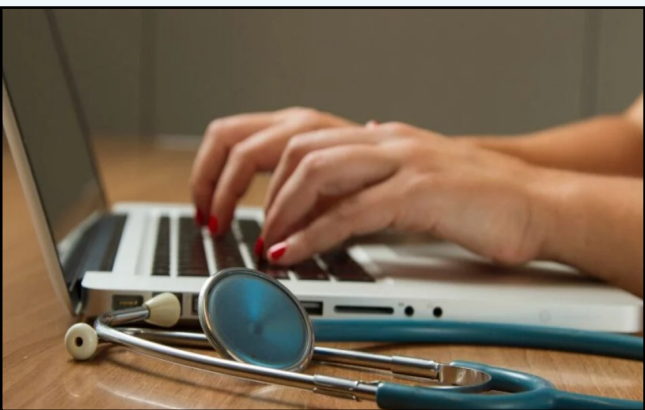

With the multi-state initiative, our members have access to providers licensed in multiple states. You can provide care for a patient who is currently in the state where you hold a license. If a Kaiser member is traveling and out of state, they would be able to receive care from a provider holding a license in the state they are visiting.

Ordinarily, this situation is avoided because all Get Care Now patients are asked where they are currently located. However, if a patient mistakenly advises the system they are in California when they are not, you may get a patient who is currently out of state.

By contacting the Q manager, the patient can be reassigned to a provider who is licensed in that state. You can tag the Q manager by typing in @QM in your message in the "Booking QM and Clinicians" Teams channel.

Additionally, all our members have coverage for care at contracted facilities around the country. The Q manager and the provider who is licensed in that state will inform the member of this coverage.

Introducing the GPC Mailbag!

At GPC Clinical Corner, we strive to provide tips on the best clinical practices, navigating patient encounters, and updated information on treatment options.

This year, we'd like to expand our scope to include your suggestions. We're proud to announce the GPC Mailbag, where you can request topics for discussion, or even specific questions, that you'd like to see in a future newsletter. You can reach us at GPCMailbag@kp.org. We look forward to hearing from you!
